

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Roaring ID-SCF-016203	IR Interpreter(s): Max Wahlberg mwahlberg@fs.fed.us	Local Dispatch Phone: ID-CIC (208) 384-3376	Interpreted Size: 2,511 acres Growth last period: 453 acres (since 8/19)
Flight Time: 0048 hrs MDT Flight Date: 8/21/2016	Interpreter(s) location: Portland, OR Interpreter(s) Phone: 928-273-0779	GACC IR Liaison: Hope Spriggs GACC IR Liaison Phone: 208-384-3376	National Coordinator: Melinda McGann National Coord. Phone: 208-387-5900
Ordered By: ID-SCF (208-756-5157)	A Number: A-11	Aircraft/Scanner System: N149Z / Phoenix	Pilots/Techs: N149Z Flight Crew left: Jack Lowrey right: Matt Smith tech: Woody Smith
IRIN Comments on imagery: Clean imagery, no cloud cover. Some latticing near the fire, but not obscuring the fire area itself.		Weather at time of flight: Clear	Flight Objective: Map heat perimeter, intense heat, scattered heat, and isolated heat
Date and Time Imagery Received by Interpreter: 8/21/2016 @ 0059 MDT		Type of media for final product: Shapefiles, PDF Map, KMZ, IR Daily Log	
Date and Time Products Delivered to Incident: 8/21/2016 @ 0415 MDT		Digital files sent to: NIFC FTP: http://ftp.nifc.gov/incident_specific_data/great_basin/2016_incidents/Roaring/IR/20160821/	
Comments / notes on tonight's mission and this interpretation: Fire growth continues along with Intense heat along the fire's northwestern edge in the Roaring Creek drainage. In this area, the fire has progressed down canyon more than ¾ mile. Fire progression was also observed in the southwestern corner of the fire where two lobes of intense heat and growth were mapped on both sides of McGuire lake. The eastern fire edge remained fairly unchanged from the previous IR flight with only a handful of isolated heat sources mapped on the eastern flank. Scattered heat was mapped in the northwest and southwest portions of the fire.
